MULTIPLE-BUDDED FRUIT TREES Please inquire about our 2-n-1, 3-n-1 and 4-n-1's (two, three or four varieties on a single tree).

GARDEN DELICIOUS GENETIC DWARF APPLE Sweet, crisp, superb flavor, even in hot climates. Greenish-yellow with red blush to full red. Dessert/cook, good keeper. September. 8-10 ft. tree, smaller with pruning. 600 hours. Self-fruitful. USDA Zones 4 - 8 (Zaiger)

ANNA APPLE Remarkable fruit for mild winter climates in S. CA., S. AZ. Heavy crops of sweet, crisp, flavorful apples even in low desert. Fresh/cooked. Keeps 2 months in refrigerator. 200 hours. Self-fruitful or pollinized by Dorsett Golden or Einshemer. USDA Zones 5 - 10.

BRAEBURN APPLE New, from New Zealand. Superb late season fruit: very crisp and tangy, more flavorful than Granny Smith. Excellent keeper. Green with dark red blush. October-November harvest. 700 hours. Self-fruitful. USDA Zones 5 - 10

DORSETT GOLDEN APPLE Outstanding sweet apple for warm winter areas. Firm, very flavorful, sweet like Golden Delicious. Productive throughout So. CA and Phoenix, AZ. Good early season sweet apple for Central CA. 100 hours. Self-fruitful. USDA Zones 5 - 10

FUJI APPLE Introduction from Japan that quickly became CA's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish orange skin, sometimes russeted. Ripe mid September. Excellent pollinizer for other apple varieties. Low chilling requirement - less than 500 hours. Self-fruitful. USDA Zones 6 - 9

GALA APPLE (Original Gala) Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish orange over yellow. Early harvest, 2 - 3 weeks before Red Delicious. Good pollinizer for other varieties. Adapted to cold and warm-winter climates. Chilling requirement less than 500 hours. Self-fruitful. USDA Zones 4 - 10

GOLDEN DELICIOUS APPLE (Yellow Delicious) Long-time favorite for its sweetness and flavor. Reliable producer, adapted to many climates. Pollinizer for Red Delicious. Mid season harvest (September in Central CA.). 700 hours. Self-fruitful. USDA Zones 5 - 10

GRANNY SMITH APPLE From New Zealand. Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer. Thrives in hot climates. 400 hours. Prolonged bloom: good pollinizer for other apples. Self-fruitful. USDA Zones 6 - 9

HONEYCRISP APPLE Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy with an aromatic flavor. Stripped red over yellow color. Stores well. Ripens mid August. Pollinized by Gala, Granny Smith, Empire, McIntosh and Red Delicious. USDA Zones 3 - 8

PINK LADY® APPLE (Cripps Pink) Hot climate apple from Western Australia. Very crisp, sweet tart, distinct flavor, good keeper. Skin reddish pink over green when ripe. White flesh resists browning. Harvest begins late October in Central CA., about three weeks after Fuji. Self-fruitful. 300-400 hours. (Pat. No. 7880). USDA Zones 6 - 9

SUNDOWNER™ APPLE A sister plant to the popular Pink Lady selection, Sundowner has a sweet, crispy, white flesh and excellent flavor. Considered a late harvest variety ripening from October well into winter in most areas. Does well under extreme fruit growing conditions such as southern fruit growing districts and deserts with little or no damage to the fruit. Chill requirement of 200 to 300 hours with high chill adaptability. Self-fruitful. (Plant Pat. No 9477).

PIXIE-COT™ MINIATURE APRICOT Compact tree with medium sized, fine quality fruit. First genetic dwarf apricot to meet the flavor standards set by Dave Wilson Nursery for release to the home gardener. Ripens first week of June in CA.'s Central Valley. 500 hours. Patent pending. (Zaiger)

AUTUMN GLO APRICOT Late season apricot with tremendous flavor. Ripens in the first two weeks of August. Fruit is medium sized with good color. One of the highest scoring apricot varieties to date at Dave Wilson Nursery fruit tastings. 500 hours or less. Self-fruitful. USDA Zones 7 - 9 (Zaiger)

BLLENHEIM (ROYAL) APRICOT All-purpose freestone, sweet, aromatic, flavorful, long-time No. 1 apricot in CA. Early bloom. Late June harvest in Central CA. 400 hours or less. Self-fruitful. USDA Zones 7 - 8

EARLI-AUTUMN APRICOT Wonderful flavor as tested by Dave Wilson Nursery both fresh and dried. Will please even the most critical of apricot lovers. Late harvest, first two weeks of August. 500 hours or less. Self-fruitful. (Pat. No. 9937). USDA Zones 7 - 9 (Zaiger)

GOLD KIST APRICOT Excellent backyard apricot for warm winter climates. Freestone, very good quality. Heavy bearing. Early harvest, 3-4 weeks before Blenheim (Royal). 300 hours. Self-fruitful. USDA Zones 7 - 9 (Zaiger)

KATY APRICOT Large, all purpose flavorful freestone. Tree ripe fruit is subacid (not tart). A favorite apricot for warm-winter climates. Early harvest, 3-4 weeks before Blenheim (Royal). 200 to 300 hours. Self-fruitful. (Expired Pat. No. 4339). USDA Zones 7 - 9 (Zaiger)

MOORPARK APRICOT Long-time favorite of apricot fanciers for its exceptionally rich flavor and aroma. Reliable producer. Used fresh and for canning. 600 hours. Self-fruitful. USDA Zones 6 - 9

ROYAL ROSA APRICOT Extremely vigorous - more disease tolerant than other apricots. Bears young and heavy. Especially nice fruit: sweet, low acid, fine flavor. Very early harvest (late May in Central CA). Excellent backyard apricot. 500 hours. Self-fruitful. USDA Zones 7 - 9 (Zaiger)

TILTON APRICOT No. 1 apricot for canning, excellent fresh or dried as well. Medium to large, firm, rich flavor - one of the best. Widely adapted. Early July in Central CA. 600 hours. Self-fruitful. USDA Zones 5 - 9

TOMCOT APRICOT A consistently productive apricot variety. Large, orange fruit with firm, sweet flesh. Slightly tart, old apricot flavor. Early harvest, 2 - 3 weeks before Wenatchee Moorpark. Originated at Prosser, WA, introduced in 1989. 500 hours or less. Partly Self-fruitful; largest crops if cross-pollinated by another apricot. (Expired Pat. No.7034). USDA Zones 4 - 8

BING CHERRY Large, firm, juicy, sweet, nearly black when ripe superb flavor, the No. 1 cherry. Mid-season. Large vigorous tree. Pollenized by Black Tart, Van, Rainier and Lapins. Also Stella in colder climates. 700 hours. USDA Zones 5 - 9

BLACK TARTARIAN CHERRY Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollenizer required - interfruitful with all popular sweet cherries. USDA Zones 5 - 7

CRAIG'S CRIMSON CHERRY Taste test winner. Self-fruitful, natural semi-dwarf sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard (smaller when budded onto Colt or Mahaleb rootstock). Mid-season. 500-600 hours. (Expired Pat. No.7320). USDA Zones 5 - 9 (Zaiger)

LAPINS CHERRY Self-fruitful, dark red sweet cherry from Canada. Large, firm, good flavor. Similar to Van in color, Bing in shape. Sometimes sold as "Self-fertile Bing." Ripens 4 days after Bing. 400 hours or less. USDA Zones 5 - 9

RAINIER SWEET CHERRY Large, yellow with red blush. Sweet and flavorful. Very cold hardy. Mid-season harvest. 700 hours. Pollenized by Van, Lambert, Lapins, Black Tartarian & Bing. USDA Zones 5 - 9

BLACK MISSION FIG The industry standard. Purplish-black skin, strawberry- colored flesh, rich flavor. Heavy bearing, long-lived, large tree. Coast or inland. Fresh/dry/can. 100 hours. Self-fruitful. USDA Zones 7 - 9

IMPROVED BROWN TURKEY FIG Large, brown skin, pink flesh. Sweet, rich flavor, used fresh. Widely adapted -coast or inland climate. Small tree, prune to any shape. 100 hours. Self-fruitful. USDA Zones 7 - 9

JANICE SEED-LESS KADOTA FIG 'White' fig. Large, sweet, delicious, light greenish-yellow fruit with practically no seeds. Prolonged harvest, August through November at Fremont, CA. Suited to coastal and inland climates. Prune to any shape. 100 hours. Self-fruitful. (Pat. No.08254)

PANACHE 'TIGER' FIG Especially fine flavor! Small to medium sized fruit with green color and yellow "Tiger" stripes. Strawberry pulp is blood-red in color. 100 hours. Self-fruitful

VIOLETTE DE BORDEAUX FIG Small to medium size purple-black fruit with a very deep red strawberry pulp, a distinctive sweet rich flavor. Brebas are pear shaped with a thick, tapering neck; main crop figs are variable often without neck. Medium eye. Excellent fresh or dried. Breba crop, hardy. Good for container culture or small spaces. Self-fruitful. USDA Zones 5 - 10

GARDEN DELIGHT MINIATURE NECTARINE Large yellow freestone. Sweet, delicious, refreshing. Mid-August in Central CA. Heavy bearing 5-6 ft. tree, easily covered to protect from frost. 500 hours or less. Self-fruitful. (Zaiger)

ARCTIC ROSE WHITE NECTARINE Delicious, super-sweet, white nectarine. Very high scoring in taste tests. Rich flavor and nice crunchy texture when firm ripe; extremely sweet when ripe. Harvest mid to late July in Central CA. Highly recommended for home orchards. 600-700 hours. Self-fruitful. (Pat. No. 7889) (Zaiger)

DOUBLE DELIGHT NECTARINE Sensational fruit consistently the best flavored yellow nectarine plus magnificent, double pink flowers. Dark red skinned, freestone fruit is sweet, with unusually rich flavor very high scoring in taste tests. Heavy bearing tree. Harvest early to mid-July in Central CA. 300 hours. Self-fruitful. (Zaiger)

LATE LEGRAND NECTARINE Old favorite yellow fleshed nectarine. Richly flavored, still one of the best. Very high taste test scores. Attractive red and yellow skin. Harvest mid to late-August in Central CA. 600 hours. Self-fruitful.

PANAMINT NECTARINE Attractive red-skinned yellow freestone. Aromatic, intensely flavored, nice acid sugar balance. Dependable, long time favorite in warm winter Southern CA. climates. Late July/early August. 250 hours. Self-fruitful

SAUZEE KING NECTARINE First "donut" style nectarine from Zaiger Hybrids. Outstanding early season variety has white flesh that is sweet and juicy. Red skin, blushed with yellow. Tree sets fruit at a young age and produces heavily. Thinning is required for large fruit size. Estimated 500 hours or less. (Pat. No. 16258) (Zaiger)

WHITE TIGER NECTARINE Medium sized white fleshed nectarine with red skin. Low chill requirement, sweet and aromatic.

ARBEQUINA ASI® OLIVE Commercially planted in super high density orchards, the low-vigor Arbequina olive tree bears fruit earlier than Traditional varieties. When planted in a wider spacing, this variety will exhibit a spreading, somewhat weeping canopy and grow to a medium size. Prized for its mild oil, the Arbequina olive is small and yields a very aromatic and fruity flavor that is low in bitterness. The tree is fairly disease-resistant and pest-tolerant. Arbequina is self-fertile, but produces higher yields when planted with a pollenizer such as Koroneiki or Arbosana.

ARBOSANA L43® OLIVE The dwarf Arbosana tree produces large crops of small olives with high concentrations of premium olive oil. The Arbosana flavor is a Complex mixture of fruitiness with a good balance of pungency and bitterness. The late-bearing Arbosana variety is fairly cold hardy though not as hardy as Arbequina. Like Arbequina, Arbosana is self-fertile, but produces higher yields when paired with a pollenizer such as Arbequina or Koroneiki.

CORATINA OLIVE This late-ripening cultivar loves long hot growing seasons where it slowly produces excellent, large fruit. In Italy, Coratina is harvested quite ripe (with black tips) resulting in a fruity flavor with floral notes. This variety can be strongly bitter and pungent if harvested green. Although it is used commercially for oil production, the Coratina olive can be picked as a green table olive. The dense, spreading Coratina tree features medium vigor and requires a pollenizer such as Frantoio or Leccino. This variety is not Recommended for cooler coastal locations where early frosts may occur.

FRANTOIO OLIVE One of the world's premier oil varieties. The medium-sized fruit also makes a good table olive after curing. The variety features a delightful balance of fruitiness, bitterness and pungency. Frantoio is highly frost-sensitive. Frantoio is self-fertile, but increases yields when pollinated by one of the other tuscan varieties such as Pendolino or Leccino.

KORONEIKI I-38® OLIVE Originating on the island of Crete some 3000 years ago, the Koroneiki olive remains most popular in Greece where it is grown almost exclusively for oil. Koroneiki boasts an intense flavor profile, which starts as a robust fruity aroma and finishes with a peppery zing. Koroneiki holds to the tree well making it a little more work to harvest compared to other varieties and is frost sensitive. Koroneiki is fully self-fertile.

LECCINO OLIVE Originating on the island of Crete some 3000 years ago, the Koroneiki olive remains most popular in Greece where it is grown almost exclusively for oil. Koroneiki boasts an intense flavor profile, which starts as a robust fruity aroma and finishes with a peppery zing. Koroneiki holds to the tree well making it a little more work to harvest compared to other varieties and is frost sensitive. Koroneiki is fully self-fertile.

MANZANILLO OLIVE The most popular table olive in CA., Manzanillo is a large, round freestone with a high flesh to pit ratio. As the Spanish Manzanillo olive ripens, the flavor becomes fruitier and less bitter, but the water content increases making it better suited to curing than extracting. The Manzanillo tree is moderately vigorous with a spreading growth habit and medium density. Though partially self-fertile, yields will increase when Manzanillo is pollinated by Sevillano or Ascolano. This variety is moderately cold hardy.

MISSION OLIVE The Mission olive is a large, erect tree used for table olives and olive oil production. This variety is tolerant of cold, salinity and drought. The Mission tree is moderately resistant to olive knot. The freestone Mission fruit produces a bitter flavor when harvested green, but matures to a complex blend of buttery and tropical flavors. Though partially self fertile, Mission will set fuller crops when pollinated by another olive such as Sevillano or Ascolano.

PENDOLINO OLIVE The Pendolino olive is used mainly as a pollinizer in Tuscany, but for landscaping Pendolino offers many desirable characteristics such as good cold hardiness and a dense, weeping canopy. It flowers early and profusely with a long bloom, but it is self-sterile and must be paired with another variety such as Leccino. Though small, the Pendolino olive produces a moderate amount of good quality oil with a very mild flavor, low bitterness and delicate pungency.

PICUAL OLIVE The Picual olive comes from Spain. Newer plantings in Chile, Australia and New Zealand are proving the value of this highly productive, early variety. Picual is easy to harvest and contains a high content of easily separated oil with pungent flavor that stores well. In Spain, Picual is a popular table olive known to be high in beneficial chemicals such as oleic acid and Vitamin E. The Picual olive is cold hardy and self-fertile, but produces higher yields when paired with a pollinizer such as Manzanillo.

ELDORADO MINIATURE PEACH Well-known Jackson & Perkins variety. Exceptionally high quality, richly flavored fruit. Yellow freestone, attractive red blushed skin. Harvest early to mid-June. 4-5 ft. tree. 400 hours or less. Self-fruitful. (Expired Pat. No. 4780)

HONEY BABE MINIATURE PEACH Sweet, yellow freestone, richpeach flavor. Heavy bearing 5 ft. tree. Early to mid July in Central CA. Excellent choice for home orchard. 400 hours or less. Self-fruitful. (Zaiger)

AUGUST PRIDE PEACH Large, all-purpose yellow freestone for mild- winter climates. Sweet, aromatic, rich flavor, one of the very best. Ripens 3-4 weeks after Mid-Pride. Chilling requirement less than 300 hours. Self-fruitful. (Zaiger)

BABCOCK WHITE PEACH Long time favorite white fleshed freestone. Sweet and juicy, aromatic, low in acid. High scoring in taste tests. Ripens mid July in Central CA. Widely adapted (low chill requirement, yet not early blooming). 250-300 hours. Self-fruitful.

BONITA PEACH Medium to large yellow freestone with red blush. Sweet, subacid, very flavorful. Proven variety for S. CA, coast or inland. Late July. Chilling requirement less than 400 hours. Self-fruitful.

CARNIVAL PEACH Very late season yellow freestone. Large red-skinned fruit ripens late September/early October in Central CA. Vigorous, productive tree. Estimated chilling requirement 500 hours or less. Self-fruitful.

EVA'S PRIDE PEACH Delicious, fine flavored peach with very low chilling requirement ripens 2-3 weeks before Mid-Pride. Medium to large-sized yellow freestone - also recommended as early season peach for moderate climates - harvest 3 weeks before July Elberta. 100-200 hours. Self- fruitful. (Expired Pat. No. 7751) (Zaiger)

JULY (KIM) ELBERTA PEACH Also called Early Elberta. Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 400-500 hours. Self-fruitful.

KAWEAH PEACH Kaweah has become a favored late summer peach providing consistent high yields and large size fruit. High scoring in taste tests. Kaweah has a delicious true peach flavor with a good balance of sugar to acid and is an all purpose fruit, good for fresh eating, baking, canning, jams and jellies. Recent low-chill trials have shown Kaweah to be productive with less than 500 chill hours. (Plant Pat. No. # 10177).

MAY PRIDE PEACH Very early ripening peach for warm winter climates. Ripens in May, about with Desert Gold. Delicious, sweet and tangy, semi-freestone when fully ripe. Very large for such an early peach. Large, showy pink blossoms. 150-200 hours. Self-fruitful. (Expired Pat. No. 7775) (Zaiger)

MID-PRIDE PEACH Best yellow freestone for warm winter climates of S. CA., Phoenix, Houston, S.F. Bay Area. Also recommended for Central CA. for its exceptional flavor and dessert quality. Mid-season. 250 hours. Self-fruitful. (Zaiger)

RED BARON PEACH Flowering/fruiting. Large, juicy, firm, richly flavored yellow freestone fruit. Showy double red blossoms. Mid-July. Long-time favorite in Southern CA. and Texas. Low chilling requirement, 250-300 hours. Self-fruitful. (Expired Pat. No. 4195)

SATURN PEACH Flowering/fruiting. Spectacular large dark pink double blossoms. Yellow freestone fruit is large, juicy, sweet, low in acid, with a fine flavor. Mid July in Central CA. Long-time favorite in S. CA. Low chilling requirement, 250-300 hours. Self-fruitful.

BELLA GOLD PEACOTUM® A new fruit type from Zaiger Hybrids. Peach x apricot x plum. Slightly fuzzy skin, like that of an apricot, is bright yellow with an attractive red blush. Tart skin gives way to mildly sweet amber flesh for a delightful eating experience. Naturally semi-dwarf tree. Known to be pollinated by Flavor Grenade Pluot®. 500 hours. (Pat. No. 17826) (Zaiger)

BARTLETT PEAR World's most popular pear. Early mid-season, high quality, tolerates hot summers. 500-600 hours. Self-fruitful in most climates of Western U.S. Elsewhere, pollinated by Bosc, D'Anjou, Winter Nelis.

BOSC PEAR Long & narrow shape, brown skin. Superb quality, one of the best. Harvest late October. Fresh/cooked. Susceptible to fire blight in warm, moist climates. 500-600 hours. Pollinated by Bartlett or other pear.

COMICE PEAR The gift pack pear. Sweet, aromatic, fine texture, superb flavor and quality - one of the best. Short neck, greenish-yellow skin with red blush. Late harvest. 600 hours. Self-fruitful in most climates of Western U.S. or plant with Bartlett.

SECKEL PEAR Connoisseurs' favorite. Sweet, flavorful, aromatic, spicy, perhaps the best. Russeted brown skin. Resists fire blight. 500 hours. Self-fruitful.

20TH CENTURY ASIAN PEAR (Nijisseiki, "Apple Pear") Juicy, sweet, mild flavored fruit is crisp like apple. Early to mid-August in Central CA. Keeps well. Easy to grow, heavy bearing small tree. 300-400 hours. Self-fruitful or pollinated. by Shinseiki, Bartlett, or other.

HOSUI ASIAN PEAR Consistently rated the best-tasting Asian pear at Dave Wilson Nursery fruit tastings. Large, juicy, sweet, flavorful, refreshing, crisp like an apple. Brownish-orange russeted skin. Harvest early to mid-August in Central CA. 300-400 hours. Pollinated by Shinko, Chojuro, Bartlett, or 20th Century.

SHINSEIKI ASIAN PEAR Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early August in Central CA. Bright yellow skin. Vigorous, heavy bearing (usually by 2nd year). 250-300 hours. Self-fruitful.

CHOCOLATE PERSIMMON Small to medium size, oblong, bright red skin. Sweet, spicy, firm, brown flesh, superb flavor the choice of connoisseurs. Astringent until ripe. 200 hours. Self-fruitful.

COFFEECAKE PERSIMMON (Nishimura Wase) Unique spicy sweet flavor that instantly evokes images of cinnamon pastry, hot coffee and morning sunshine. Coffeecake™ ripens about the same time as Chocolate and about three weeks to one month earlier than Fuyu. Coffeecake™ Persimmon is non-astringent and can be eaten while still firm. Hardy, attractive tree, practically free of pests and disease. Estimated chilling requirement: 200 hours or less. Another persimmon variety required as a pollinizer. Gosho or Chocolate are the best pollinizers for Coffeecake™.

FUYU PERSIMMON - JIRO (“Apple Persimmon”) Medium size, flat shape, still crunchy when ripe, non-astringent. Cool or hot climate. Hardy, attractive tree, practically pest free. Fall harvest. 200 hours. Self-fruitful.

HACHIYA PERSIMMON Large, deep orange-red, acorn-shaped. Hot summer required to mature the fruit. Sweet, flavorful, astringent until soft ripe. Mature fruit can be frozen and thawed to ripen. Productive, ornamental. 200 hours. Self-fruitful.

BURGUNDY PLUM Maroon colored skin and semi freestone flesh. Sweet, with little or no tartness and a very pleasing, mild flavor. High taste test scores. Prolonged harvest, mid-July to mid-August in Central CA. Very productive. Narrow, upright habit. 300 hours. Self-fruitful.

CATALINA PLUM Large, black, favorite fresh market plum. Sweet and juicy but still firm when fully ripe, with very little tartness at skin and pit. Very high taste test scores; one of the best plums for fresh eating. Ripe late July in Central CA. Vigorous, productive tree. 300-400 hours. Self-fruitful.

GOLDEN NECTAR PLUM Popular yellow dessert plum. Large, oblong fruit with waxy, thin, amber skin. Amber flesh is firm, sweet and flavorful. Very small pit. August harvest in Central CA. 400 hours or less. Self-fruitful.

SANTA ROSA PLUM Most popular plum in CA. & Arizona. Juicy, tangy & flavorful. Reddish purple skin, amber flesh tinged red. Late June in Central CA. 300 hours. Self-fruitful.

SATSUMA PLUM Long-time favorite plum in CA. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Harvest late July. 300 hours. Pollenized by Santa Rosa or Beauty.

WEeping SANTA ROSA SEMI-DWARF PLUM One of the most flavorful, aromatic Japanese plums when fully ripe. Beautiful 8-10 ft. tree, weeping growth habit; long slender limbs bow gracefully to the ground. Easily espaliered. 200-400 hours. Self-fruitful.

ITALIAN PRUNE Large, purple skin, freestone. Rich flavor, very sweet when fully ripe. Fresh/dried/canned. Vigorous, cold hardy tree. Late bloom. Late summer harvest. 800 hours. Self-fruitful.

COT-N-CANDY APRIUM® INTERSPECIFIC Wonderful new fruit from Zaiger Hybrids. White flesh apricot plum hybrid. Medium sized with incredible flavor, very sweet and juicy. Ripens early to mid July. Self-fruitful. 400 hours or less. Patent pending USDA Zones 7 - 10 (Zaiger)

FLAVOR DELIGHT APRIUM® INTERSPECIFIC Apricot-plum hybrid. Resembles an apricot but with a distinctive flavor and texture all its own. High taste-test scores, one of the most flavorful early season fruits. Early June. Very low chilling requirement. Less than 300 hours. Self-fruitful, but largest crops if pollinized by any apricot. (Expired Pat. No. 7090) (Zaiger)

PARFIANKA POMEGRANATE Wolfskil- Dr. Levin selection. Large size Red fruit is sweet with a hint of acidity. Arils are red with very small edible seeds. Vigorous upright plant sets a heavy crop dependably. Maintain at any height with summer pruning. Always receives the highest praise for overall flavor. Great for juice or fresh eating. 150-200 chill hours. Self-fruitful

SWEET POMEGRANATE Sweeter fruit than Wonderful, more widely adapted (better quality in cool-summer climates). Small, glossy-leaved, ornamental tree with showy orange-red blossoms in late spring. Very suitable to espalier and container growing. Harvest late summer. Unsplit ripe fruit stores in cool, dry place for two months or more. Very low chilling requirement, about 100 hours. Self-fruitful.

WONDERFUL POMEGRANATE Large, purple-red fruit with delicious, tangy flavor. Best quality in hot inland climate. Gaudy red orange bloom, ornamental foliage. Long-lived, any soil. 150 hours. Self-fruitful.

ALL-IN-ONE GENETIC SEMI-DWARF ALMOND No. 1 almond for home orchards. Heavy crops of soft shell nuts with sweet, flavorful kernels. Hot summer required to ripen. 15 ft. tree, very winter & frost hardy. 300-400 hrs. Self-fruitful. (Expired Pat. No. 4304) (Zaiger)

KERMAN FEMALE PISTACHIO Long hot summers required to ripen. Plant from containers only, do not disturb root ball when handling. Very slow-growing to 20-30 ft. Drought-resistant. 800 hours. Pollenized by Peters.

PETERS MALE PISTACHIO Pollenizer for Kerman. Does not bear fruit. One Peters pollinates up to eleven females. Plant from containers only. Drought-resistant once established. 800 hours.

PEDRO WALNUT Very small tree, less than 2/3 the size of other varieties. Well-sealed nut, similar to Payne, has perhaps the finest-flavored kernel - winner of consumer taste tests. Widely adapted, excellent choice for home planting. 400 hours. Self-fruitful. (Rootstock: NCB walnut.)

PLACENTIA WALNUT Best of the Santa Barbara-types, selected in the early 1900s. Adapted to mild-winter coastal climates of Southern CA. Medium-sized nuts with fairly well-sealed thin shells. Light-colored plump kernel, mild flavor. Estimated chilling requirement: less than 300 hours. Self-fruitful.

JUBILEE BLUEBERRY Southern Highbush. Midseason, Sweet, firm berry. Upright and quite compact, with fruit borne on the outer periphery of the bush. Chilling requirement is estimated at 400-500 hours.

MISTY BLUEBERRY Southern Highbush. Early, in the West Misty is quite vigorous, growing very well both on the coast and in the inland heat. This excellent flavored fruit does well in areas with chilling as low as 150 hours and all areas with mild winters and hot summers.

O'NEAL BLUEBERRY Southern Highbush (low chill, tolerates heat). Large fruit is especially sweet and flavorful. Early season. Soil must be acidic, high in humus. 5-6 ft. bush. 200 hours. Self-fruitful, but plant two varieties for largest crops.

PINK LEMONADE BLUEBERRY Pink Lemonade offers something unique in edible fruits. White translucent berries mature to a luscious bright pink and taste wonderfully sweet with a firm, clear texture. 'Pink Lemonade' will produce farther south than many traditional blueberry cultivars. Berry color and flavor will attract both gourmet cooks and those seeking a culinary novelty, however, it is the beauty of the plant that will earn respect of gardeners everywhere. Estimated Chill 400 - 500 hours.

SHARPBLUE BLUEBERRY Southern Highbush. Excellent flavor. Nearly evergreen in mild winter climates. Bares fruit nearly year-round. Vigorous plant to 6 ft. Dime-sized dark blue fruit. 200 hours.

SOUTHMOON BLUEBERRY Southern Highbush. Exceptional berries with superb flavor. Florida native with vigorous, upright character. Performs well in CA, both inland and coastal. Prefers light sandy soils. 200-300 hours. (Pat. No. 9834)

SUNSHINE BLUE BLUEBERRY Southern Highbush cultivar. Great flavored firm berries. Ripens May 10 through June 15 at Gainesville, Florida. A semi dwarf evergreen bush with great fall color. Showy hot pink flowers fade to white in spring. Self-fruitful. Estimated chilling hours needed 150 hours, but very cold hardy as well.

BLACK MONUKKA SEEDLESS GRAPE Large, purplish-black, sweet, crisp. Does not require as much summer heat as Thompson. Fresh or raisins. Early mid-season. 100 hours. Self-fruitful. Cane or spur prune.

CRIMSON SEEDLESS GRAPE New late season seedless grape, ripens early October in Fresno, CA. Medium size, firm, very sweet, excellent quality. Cane prune. 100 hours. Self-fruitful.

FLAME SEEDLESS GRAPE Medium-sized, light red. Crisp, sweet, excellent flavor. For fresh use or raisins. Needs hot summer. Ripens before Thompson. Vigorous. 100 hours. Self-fruitful. Cane or spur prune.

MUSCAT OF ALEXANDRIA GRAPE Large, dull green, egg-shaped. Juicy, distinctive flavor and aroma. Table, wine, raisins. Not suited to hot desert climates. 100 hours. Self-fruitful. Spur prune.

PERLETTE SEEDLESS GRAPE Pale green berry is crisp and juicy. Larger than Thompson and two weeks earlier. Requires less summer heat than Thompson to ripen. 100 hours. Self-fruitful. Cane prune.

CANADICE SEEDLESS GRAPE Early ripening red seedless grape derived from Himrod. Extremely winter hardy. First choice seedless grape for cold winter climates. 100 hours. Self-fruitful. Spur prune.

INTERLAKEN SEEDLESS GRAPE Hybrid of Thompson Seedless & American. More cold hardy than Thompson. Less heat to ripen. Pale green berry is sweet, crisp. Early harvest. 100 hours. Self-fruitful. Cane prune.

GEWURTZTRAMINER GRAPE From Germany. Small pink to bluish brown berries. Fruity, spicy, aromatic, moderately sweet white wine. Requires cool summers for best quality. Cane prune. 100 hours. Self-fruitful.

KRAUTER VESUVIUS FLOWERING PLUM Dark purple leaves, light pink blossoms, little or no fruit. Relatively small tree, 18 by 12 ft. wide. Favorite purple leaf plum for CA. Foliage of newly planted trees sometimes greenish until vigorous growth begins.

PAKISTAN FRUITING MULBERRY Long (3 inches), firm, red to black, sweet fruit. Non-staining juice. Month-long early summer harvest. Fruit used fresh and for pies, jams and jellies. Large, vigorous, disease-resistant tree.

PERSIAN FRUITING MULBERRY (*Morus nigra*) Densely foliated tree to 25-30 ft. Large heart-shaped leaves. Large fruit is juicy, dark red to black & good for jam.
